Again, it was a nice, 10-20 mph breezy, somewhat overcast day with on and off drizzling throughout the morning. Nevertheless we had a pretty nice turnout of the Figure 9er membership. Unfortunately, our youngest member, KJ, experienced the feelings associated with rapid uncontrolled decent twice but whos counting?? Over the course of the two days we managed to complete 120 flights.	5

Between the cookout on one of the days, the camaraderie between all of us and just the fun we have trying to put up as many flights as possible on one flying circle. We incorporate both electric and glow powered "throttle" planes to take off, fly the 5 prescribed laps, land on lap 6 and come to a complete stop before repeating the process. Don't change a thing with this event no matter what is said. It's PERFECT the way it is.	5

We have held 20 consecutive Annual Stunt Fest contests. The Ringmaster-a-Thon, which follows this contest, has also been held for 19 years. It has become an event that fosters comradery, friendship, and fun. It caps the end of our official flying season. Our flyers have brought Ringmasters that were used in their youth and custom built. It is a very essential part of the control line community.	5

We started Friday evening and finished up Sunday evening. We have been doing an event withing the event for several years now, the thousand lap club which gets you a T-shirt showing you are part of the "elite" LOL. This year is the first year three of us made the 2000 lap club. Overall about 450 miles of Ringmaster flying. As always its the best event we do annually.	5
	10/6/2025	David	Gardner	davegardner717@outlook.com	United States	WA		Roegner Park, Auburn, WA	NW Skyraiders	233	S-1, Ringmaster 576E, RingRat 250, RingMonster (150%), Baby Ringmaster	11	Steve Ashmore, John Knoppi, Bob Welch, Mike Dukes, Buzz Wilson, Rod Claus, Kris Millard, Steve Helmick, Al Fernandez, Jim Schneider, Mike Haverly	Several of the electric powered planes got multiple flights from a common time in the circle, by flying 5 laps, shutting off, landing, restarting and flying another 5 laps, until their batteries were used up! (6 -10 flights per battery charge) One of the i.c. powered planes used the J Roberts 3 line control, allowing similar flights; 5 laps, landing at idle to full stop, then taking off again.	5
	10/6/2025	John	Thompson	jthompson4051@gmail.com	United States	OR		Junction City	Eugene Prop Spinners	10	S-1, Super	3	Russ Hester, Gene Pape, John Thompson	Gene flew 7 flights on his S-1 powered by McCoy .35. Russ flew one flight on an S-1 powered by K&A;B .28 that is maintained by the club at our field for anyone who wants to fly it. John flew two flights on his Super Ringmaster; it was a very windy day and the Super crashed on the second flight after being blown out of a maneuver, but only damage was a broken prop.	5

	10/6/2025	Martin C.	Quartim	martin.av8tor@gmail.com	Brazil		Brazil	Piracicaba, SP		42	3 Ringmasters S1	8	Jonas Brossi Rogério Henrique Rodrigo Bruno Martin	Saturday morning was very windy and only me made 3 flights, then it rained for sometime and we resume flying after the rain in calm winds and made several flights. Sunday was a perfect day for flying but we started after 14:30 and flew until sunset. We flew solo and combined with 3 or 2 Ringmaster at the same time. We did encourage everybody to fly our planes and those who never flew one before love it! I believe next year we will have a lot more ringmasters flying in our Circle.	5
